

# TULMAR

## INFLATABLE SHELTER SYSTEMS

*Designed and built in Canada to withstand harsh weather conditions.  
Used by Police and Security Forces around the world.*

### RAPID DEPLOYMENT

Simply unpack from valise and inflate using compressed air or blower. Deployable in less than 5 minutes using bottled air.

### MODULAR BASE UNIT

Removable canopy, floor and end-walls can be easily detached for repair or replacement. Over-arching zippers on end-panels enable multiple shelters to be connected together quickly and easily.

### CUSTOM FEATURES

Skylights, windows, utility ducts, privacy curtains and interior hanging straps can be located according to customer needs. Silk screened lettering or corporate logos and color options are available.

12 X 15 MODEL

PRIVACY CURTAIN

### CUSTOMIZED CONFIGURATION

Whether you need a shelter for command and control, cold weather operations, dive operations, EOD operations, we can meet your configuration requirements with the Tulmar Modular Inflatable Shelter.

# TULMAR
