

Sidewall Cargo Net

Quick & simple cargo solution for CV-22 Cabin

Operational Description

- Used to secure small, lightweight items (aircrew “Go” bags, personal weapons, crypto kit, ammo bags, medical bags, water/MRE bags, team carry-on equipment)
- Two (2) of these nets, installed forward and aft of the MAT(s), enhances storage and accessibility
- Turns a pair of wall tie-down points into a centralized area for securing anything the aircrew brings aboard
- Gets small items up off of the floor, allows maximum space for cargo/team members
- Items are consolidated in one area, improves overall cabin security

Product Overview

Constructed from nylon webbing and adjustable ratchet buckles, this sidewall cargo net provides an inexpensive, simple solution to deficiencies in the CV-22 cabin, allowing more efficient loading and stowage of items typically carried in the cargo compartment.

Dimensions:

Net only – 37.7” x 37.7” (at the rings)

Overall – 53” x 53” adjustable to 87.5” x 87.5” (at securing points)

Working load limit:

300 lbs (tested to 3600 lbs without failure)
